

ALUR TAHER BASHA

Full Stack Developer | AI Integration | Backend Engineer

8499089094 | taherbasha295@gmail.com | Bangalore | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Full Stack Developer with deployed AI-powered applications using React.js, Node.js, and MongoDB. Built production systems integrating Claude API, Gemini AI, and LangChain RAG pipelines. Strong in REST API design, JWT auth, AWS deployment, and real-time architectures. Mentored 200+ students in DSA and backend development. M.Tech CSE | 8.5 CGPA

TECHNICAL SKILLS

Languages: JavaScript, Python, Java

Backend/ Frontend: Node.js, Express.js, REST APIs, JWT | React.js, Tailwind CSS, Web Speech API

AI & ML: Claude API, Gemini AI, LangChain, FAISS, RAG Pipelines, Prompt Engineering

Cloud & Tools: AWS (EC2, S3, RDS), Nginx, PM2, MongoDB, MySQL, Git, Postman, CI/CD (Jenkins)

PROFESSIONAL EXPERIENCE

Full Stack Developer — ZRUTAM LLP | Remote

May 2026 – Present

- Building full-stack features using React.js and Node.js; integrating real-time communication via Socket.IO for live collaboration functionality.
- Developing LangChain and RAG-based AI features, applying experience from prior projects to production-grade enterprise workflows.
- Contributing to end-to-end feature development across frontend, backend, and AI integration layers

Technical Mentor (Part-Time) — Sharpener Tech | Remote

Sep 2025 – Mar 2026

- Mentored 200+ students in JavaScript, SQL, DSA, and Node.js/Express.js backend development across structured weekly sessions.
- Conducted 100+ mock interviews covering SQL query optimization and algorithmic problem-solving; provided actionable feedback that improved student placement outcomes.

PROJECTS

AI Roleplay Assessment Tool | React.js, Node.js, Claude API, Web Speech API

Apr 2026 – Present

- Voice-driven AI sales simulator — users interact with an AI customer entirely through speech, with real-time speech-to-text and TTS responses.
- Claude API scoring engine evaluates sessions across 5+ criteria including tone, objection handling, empathy, and closure rate.
- Auto-generates structured session transcripts with timestamped exchanges and per-criteria performance breakdown.
- Implemented session state management to persist multi-turn conversation context across the full interaction lifecycle.
- Designed fully responsive UI supporting seamless mobile and desktop usage with accessible controls.
- Live: <https://ai-roleplay-1-nuc2.onrender.com/>

CareerPilot AI | React.js, Node.js, MongoDB, Gemini AI, AWS

Jan 2026– Mar 2026

- Full-stack AI career platform that parses uploaded resumes (PDF/DOCX), performs skill gap analysis, and generates personalized interview plans.
- AI-driven match scoring compares candidate profile against job descriptions and generates targeted interview questions using Gemini AI.
- Built secure JWT-based authentication with logout token invalidation and protected route handling on both client and server.
- Deployed full stack on Render with MongoDB Atlas, integrated automated PDF report generation for career roadmaps.
- Live: <https://careerpilot-ai-1-zs3k.onrender.com>

RAG Medical Assistant | Python, LangChain, FAISS | Final Year Project

Nov 2025 – May 2026

- Built a medical Q&A Retrieval-Augmented Generation pipeline using LangChain and FAISS vector store..
- Designed document ingestion and chunking pipeline that embeds medical knowledge base into a searchable FAISS index for fast semantic retrieval.
- Modular architecture (ingestion → embedding → retrieval → generation) significantly reduced LLM hallucinations vs. vanilla prompting.

EDUCATION

M.Tech – Computer Science & Engineering

Bheema Institute of Technology and Science, Adoni

Jul 2024 – Mar 2026

CGPA: 8.5 / 10
